BUILT FOR LINEMEN

ALUMINUM FRAMING STAND

The DDIN Aluminum Framing Stand provides an easy and simple way of lifting poles into position for framing, turning it into a one-man operation, which saves time. When used in conjunction with a cant hook, the cradle uses a simple cam principle of rocking the pole off the ground and up. It can handle poles with diameters up to 19 inches.

- ***The Gold Standard***
- Handles poles up to 19" in diameter

PART #	WIDTH	LENGTH	HEIGHT	WEIGHT
DNAFS	9"	15"	18"	24.5 lbs.
